NORTH-HOLLAND

Author Index—Volume 55

Alic, J.A., 1

DeCanio, S.J., 249
Deschamps, I., 107

Givon, M., 131

Hansen, P.A., 179

Jakelski, D., 165
Jenkins, L., 15
Jeong, G.H., 203

Kim, S.H., 203
Klein, J.J., 265

Laitner, J.A., 249
LaLonde, M., 107
LeBrasseur, R., 165
Lim, Y.-T., 265

Mahajan, V., 131
Marchetti, C., 281
Mercer, D., 145, 155
Muller, E., 131

Narain, R., 83

Pauchant, T.C., 107
Pelc, K.I., 201
Phillips, F., 193

Raymond, S.U., 39

Serin, G., 179
Sutherland, J.W., 215

van Wyk, R.J., 21

Waaub, J.-P., 107
Werthamer, R.N., 39
White, D.J., 55
White, K.P., Jr., 55

Yadav, R.C., 83

Book Review Index—Volume 55

Bishop, P.C., *Foundations of Futures Studies: Human Sciences for a New Era, Vol. 1: History, Purposes, and Knowledge* (Wendell Bell), 197

Hauptman, O. and Neuringer, J., *The Knowledge-Creating Company: How Japanese Companies Create the Dynamics of Innovation* (Hirotaka Takeuchi), 99

Linstone, H.A., *"Octave"—Analytical Bibliography of Future Oriented Studies in Western Europe (1993–1995)* (Futuribles International), 105

Linstone, H.A., *"Oscar"—Futures Studies in Western Europe: Directory of Individuals and Organizations* (Futuribles International), 103

Subject Index—Volume 55

Acceleration, macrocybernetic process management systems and, 215
Access to information, continuous improvement in North American mining industry and, 165
Adoption dynamics, software brand and, 131
Aesthetics, environmental debate and, 193
Ages, and longevity and life expectancy, 281

Technological Forecasting and Social Change 55, 301–307 (1997)
© 1997 Elsevier Science Inc.
655 Avenue of the Americas, New York, NY 10010
0040-1625/97/$17.00
PII S0040-1625(97)00061-9

Aggregated expectations hypothesis, 145, 155
Annual revenues, continuous improvement in North American mining industry and, 165
Applications software, finance and, 39
Aspirations, multiple-objective methods in regulatory decision making and, 55
Assimilation, and technology gap between Korea and Japan, 265

Behavioral learning, crises and, 107
Benefits, computerized automation in manufacturing industries and, 83
Bias, future scenario development and, 15
Bottleneck, to sustainability, 1
Brand switching, competitive software market and, 131
Broader financial access, electronic markets and, 39
Broader-purview process management systems, macrocybernetic process management systems and, 215

Canada, *Nestucca* oil spill in, 107
Capital costs, energy demand forecasting and, 249
Casual concepts, qualitative cross-impact approach and, 203
Change-oriented model, of continuous improvement implementation, 165
China, futures studies in, 105
Commercial financial institutions, electronic markets and, 39
Common asymptote, and longevity and life expectancy, 281
Company goal acceptance, continuous improvement in North American mining industry and, 165
Competition
  Indian manufacturing industries and, 83
  low-technology industries and, 179
Complementary data bases, futures studies in Western Europe and, 103, 105
Complexity, crises and, 107
Complex systems, analysis of, 201
Computerized automation, Indian manufacturing industries and, 83
Computers, finance and, 39
Conceptual framework, regulatory decision making and, 55
Constituencies, multiple-objective methods in regulatory decision making and, 55
Constructs, macrocybernetic process management systems and, 215
Content of change, continuous improvement in North American mining industry and, 165
Context of change, continuous improvement in North American mining industry and, 165
Continuation, macrocybernetic process management systems and, 215
Continuous improvement, in North American mining industry, 165
Conventional costs, energy demand forecasting and, 249
Core competencies, strategic technology scanning and, 21
Corporate learning, strategic technology scanning and, 21
Corporate presence, continuous improvement in North American mining industry and, 165
Costs, energy demand forecasting and, 249
Creation, job, 1
Crises, and complexity and systemic management, 107
Cross-impact approach, qualitative, 203
Customer-oriented strategy, continuous improvement in North American mining industry and, 165

Debate, environmental, 193
Delphi technique, futures studies and, 105
Denmark, packaging industry in, 179
Destruction, job, 1
Developing countries
  technological change and, 1
  and technology gap between Korea and Japan, 265

Development
  scenario, 15
  sustainable, 1
Dewey, John, 107
Differential piracy, competitive software market and, 131
Diffusion modeling approach, competitive software market and, 131
Diffusion of innovations, energy demand forecasting and, 249
Direct impact, qualitative cross-impact approach and, 203
Direct labor content of production, reducing, 1
Disappearance, of low-technology products, 179
DNA coding, and longevity and life expectancy, 281

Econometric study, on technology gap between Korea and Japan, 265
Economic issues, aggregated expectations hypothesis and, 145
Electrical industry, and technology gap between Korea and Japan, 265
Electronic markets, finance and, 39
Electronics industry, and technology gap between Korea and Japan, 265
Embarrassments, macrocybernetic process management systems and, 215
Employee involvement, continuous improvement in North American mining industry and, 165
Employment, technological change and, 1
Energy demand forecasting, modeling technological change and, 249
Energy-efficient technologies, energy demand forecasting and, 249
Environment
  public health and aesthetics in, 193
  strategic technology scanning and, 21
Estimates, energy demand forecasting and, 249
Europe
  futures studies in, 103, 105
  longevity and life expectancy in, 281
Evolution, and longevity and life expectancy, 281
Expectations, aggregated, 145, 155
External environment, strategic technology scanning and, 21
Exxon Valdez disaster, and complexity and systemic management, 107

Factor values, future scenario development and, 15
Finance, technology and, 39
Finland, futures studies in, 105
Focus groups, aggregated expectations hypothesis and, 155
Follower nation, and technology gap between Korea and Japan, 265
Formal analyses, multiple-objective methods in regulatory decision making and, 55
France, futures studies in, 103, 105
Future outcomes, aggregated expectations hypothesis and, 145, 155
Future scenarios, systematic development of, 15
Futures studies
  foundations of, 197
  in Western Europe, 103, 105
Future technologies, qualitative cross-impact approach and, 203
Futuribles International, 103, 105
Fuzzy relations, qualitative cross-impact approach and, 203

General machinery industry, and technology gap between Korea and Japan, 265
Germany, futures studies in, 105
Global finance, technology and, 39
Global trends, aggregated expectations hypothesis and, 155
Government central banks, electronic markets and, 39
Governments, aggregated expectations hypothesis and, 145
Greenhouse gas emissions, energy demand forecasting and, 249
Growth, information resources and, 201

Hidden innovation processes, low-technology industries and, 179
Hierarchy, strategic technology scanning and, 21
Holistic theories, and longevity and life expectancy, 281
HRM policies, continuous improvement in North American mining industry and, 165
Human change pace, macrocybernetic process management systems and, 215
Human sciences, for new era, 197
Hygiene, and longevity and life expectancy, 281

Illegal adoption dynamics, competitive software market and, 131
Impact, qualitative cross-impact approach and, 203
Implicit discount rate, energy demand forecasting and, 249
Importation of advanced technology, and technology gap between Korea and Japan, 265
Improved products, energy demand forecasting and, 249
Incompatible factor value pairs, future scenario development and, 15
Incomplete specification, energy demand forecasting and, 249
India, computerized automation effect on manufacturing industries in, 83
Indirect impact, qualitative cross-impact approach and, 203
Individual decisions, aggregated expectations hypothesis and, 145
Industrial economies
  jobless growth and, 1
  low-technology industries and, 179
Information resources, explosive growth of, 201
Innovations
  diffusion of, 249
  dynamics of, 99
  low-technology industries and, 179
Institutionalization, of systemic lessons, 107
Integer linear program, future scenario development and, 15
Integrated theories, and longevity and life expectancy, 281
Interests, multiple-objective methods in regulatory decision making and, 55
Internal capabilites, strategic technology scanning and, 21
International competition, Indian manufacturing industries and, 83
Investment costs, electronic markets and, 39
Investment criteria, computerized automation in manufacturing industries and, 83
Investment decisions, energy demand forecasting and, 249
Italy, futures studies in, 105
Integer linear program, future scenario development and, 15
Integrated theories, and longevity and life expectancy, 281
Interests, multiple-objective methods in regulatory decision making and, 55
Internal capabilites, strategic technology scanning and, 21
International competition, Indian manufacturing industries and, 83

Japan
  futures studies in, 105
  knowledge-creating companies in, 99
  technology gap between Korea and, 265
Job market
  finance industry, 39
  technological change and, 1

Key objectives, multiple-objective methods in regulatory decision making and, 55
Key technology, qualitative cross-impact approach and, 203
Knowledge-creating company, 99
Korea, technology gap between Japan and, 265

Large-scale job creation, fundamental bottleneck to sustainability and, 1
Leader nation, and technology gap between Korea and Japan, 265
Leadership, continuous improvement in North American mining industry and, 165
Legal adoption dynamics, competitive software market and, 131
Life expectancy, increase in, 281
Life-style, and longevity and life expectancy, 281
Linear analysis, of crisis, 107
Linear regression, continuous improvement in North American mining industry and, 165
Linguistic terms, qualitative cross-impact approach and, 203
Localization, and technology gap between Korea and Japan, 265
Logistic equations, and longevity and life expectancy, 281
Longevity, life expectancy and, 281
Lotus 1-2-3, competitive software market and, 131
Low-technology industries, hidden innovation processes in, 179
Lower-income countries, new jobs and, 1

Macrocybernetic process management systems, prospective on, 215
Macro-outcomes, aggregated expectations hypothesis and, 155
Malcolm Baldridge criteria, continuous improvement in North American mining industry and, 165
Management
  aggregated expectations hypothesis and, 155
  electronic markets and, 39
  macrocybernetic process systems and, 215
  strategic technology scanning and, 21
  systemic, 107
Manufacturing industries, computerized automation and, 83
Mapping
  aggregated expectations hypothesis and, 155
  and longevity and life expectancy, 281
Marketplace, nearly instantaneous, 39
Market share, competitive software market and, 131
Mathematics of learning processes, and longevity and life expectancy, 281
Maximization, strategic technology scanning and, 21
Medicine, and longevity and life expectancy, 281
Men, longevity and life expectancy in, 281
Mining industry, North American, 165
Modification
  energy demand forecasting and, 249
  and technology gap between Korea and Japan, 265
Monetary mechanisms, electronic markets and, 39
Motivation, future scenario development and, 15
Multiple-objective methods, regulatory decision making and, 55

Neglect, future scenario development and, 15
Nestucca oil spill, and complexity and systemic management, 107
New products, energy demand forecasting and, 249
New ways of working, continuous improvement in North American mining industry and, 165
North America, mining industry in, 165
Novell WordPerfect, competitive software market and, 131

Octave complementary data base, futures studies in Western Europe and, 103, 105
Operating costs, energy demand forecasting and, 249
Opportunities, electronic markets and, 39
Organization for Economic Cooperation and Development (OECD), low-technology industries and, 179
Oscar complementary data base, futures studies in Western Europe and, 103, 105
Over-representation, future scenario development and, 15

Packaging industry, low-technology, 179
Paradigmatic learning, crises and, 107
Paradox, technological, 179
Pirated software brands, competitive market and, 131
Planning, computerized automation in manufacturing industries and, 83
Policy
  continuous improvement in North American mining industry and, 165
  energy demand forecasting and, 249
  qualitative cross-impact approach and, 203
Political issues, aggregated expectations hypothesis and, 145
Portugal, futures studies in, 105
Practical goals, continuous improvement in North American mining industry and, 165
"Practical man", low-technology industries and, 179
Principal component factor analysis, continuous improvement in North American mining industry and, 165
Process control systems, macrocybernetic, 215
Process of change, continuous improvement in North American mining industry and, 165
Product categories, competitive software market and, 131
Productivity gap, continuous improvement in North American mining industry and, 165
Projections, energy demand forecasting and, 249
Project scope accomodation, macrocybernetic process management systems and, 215
Public health, environmental debate and, 193
Public policy making, multiple-objective methods and, 55

Qualitative cross-impact approach, key technology and, 203
Qualitative level, multiple-objective methods in regulatory decision making and, 55
Qualitative techniques, aggregated expectations hypothesis and, 155
Quantitative models
  aggregated expectations hypothesis and, 155
  and longevity and life expectancy, 281
Questionnaires, futures studies in Western Europe and, 103

Regulatory decision making, multiple-objective methods in, 55
Research and development (R&D)
  low-technology industries and, 179
  qualitative cross-impact approach and, 203

Scalar-objective approaches, multiple-objective methods in regulatory decision making and, 55
Scanning, strategic technology and, 21
Scenario forcasting, aggregated expectations hypothesis and, 155
Secular evolution, and longevity and life expectancy, 281
Security, economic, 1
Selecting futures, for scenario development, 15
Semantic differentials, aggregated expectations hypothesis and, 155
Sensitivity analysis, and technology gap between Korea and Japan, 265
Simple mathematics, and longevity and life expectancy, 281
Small firms, low-technology industries and, 179
Social change, electronic markets and, 39
Software brand, competitive software market and, 131
Spain, futures studies in, 105
Spreadsheets, competitive software market and, 131
Stakeholders, multiple-objective methods in regulatory decision making and, 55
Strategic technology scanning, procedure for, 21
Strategy, energy demand forecasting and, 249

Stumbling blocks, and longevity and life expectancy, 281
Survey point, computerized automation in manufacturing industries and, 83
Surveys, aggregated expectations hypothesis and, 155
Switching, brand, 131
Systemic learning, crises and, 107
Systemic management, crises and, 107

"Tacit knowledge", low-technology industries and, 179
Teamwork, continuous improvement in North American mining industry and, 165
Technological pace, macrocybernetic process management systems and, 215
Technological paradox, low-technology industries and, 179
Technology impact assessment, qualitative cross-impact approach and, 203
Telecommunications, finance and, 39
Tensions, electronic markets and, 39
Transaction times, electronic markets and, 39

Unit costs, electronic markets and, 39
United Kingdom, competitive software market in, 131
United States, automobile safety standards in, 55
Unit sales-based market share, competitive software market and, 131
Unlocking strategies, systemic management and, 107
Uptake, of technological change, 39
User-based market share, competitive software market and, 131

Variety of futures, for scenario development, 15
Virtual markets, regulatory headaches and, 39

Wages, low-technology industries and, 179
Western Europe, futures studies in, 103, 105
Wisdom systems, 201
Women, longevity and life expectancy in, 281
WordPerfect, competitive software market and, 131
Word processors, competitive software market and, 131
